Carbon Footprint Management Course: An Introductory Programme Plus Practical Carbon Foot Print Techniques 2- Day Course

Awareness of, and practical skills in Carbon Foot Print techniques, is vital to every organisation today. This course provides skills for organisations to monitor, measure and minimise their carbon footprint and improve their environmental performance.

Course objectives

This 2-day programme is aimed at people in business, commerce, retail, industry and government departments who want to improve their understanding of carbon footprinting. This course provides practical training in how to calculate and reduce the carbon footprint of your organisation, product or service and achieve environmental improvements and cost savings. A live Site Carbon Audit is included in this course.

Course content

This highly interactive course covers the following topics on

DAY - 1

- Introduction
- Background to Carbon footprinting
- Carbon footprint techniques
- How to calculate a carbon footprint
- Carbon footprint standards
- Green House Gas protocol
- PAS 2050:2008 Carbon Life-Cycle
- Understand ISO 14064:2006
- Pilot projects
- Reducing your carbon footprint
- "Going carbon neutral"

DAY - 2

- Planning and conducting a carbon footprint audit
- Setting the scope and boundaries
- Greenhouse Gas Standards for Quantification and Reporting
- Identifying opportunities for carbon reduction
- Integrating into standards and systems
- Site tour and "live" carbon audit
- Developing action plans/recommendations
- Communicating Carbon Foot Print findings

Who should attend?

The course is ideal for managers, SHEQ staff, technical staff, environmental officers, consultants from all business sectors, who need to know how to understand, calculate and reduce the carbon footprint of an organisation, product or service.

What you will learn

By the end of the course you will learn how to calculate a carbon footprint and to launch a programme to reduce the carbon footprint of any organisation.
